Process for preparing water-soluble or water-dispersible polyether-containing polymers and the use thereof as coating agents, binders and/or film-forming excipients in pharmaceutical dosage forms or packaging materials or as additives in cosmetic, dermatological or hygienic preparations

Abstract

- 10 A process for preparing graft copolymers of polyvinyl esters by polymerization of
- a) at least one vinyl ester of aliphatic C_1 - C_{24} -carboxylic acids in the presence of
- 15
- b) polyethers which are solid at room temperature and have the general formula I,
- c) and, where appropriate, at least one other monomer
- 20
- using a free-radical organic initiator system, wherein liquid polyalkylene glycol is used as solvent for the free-radical initiator system (feed).
